

## Candidate for City Council District 3

### Bryant Anderson (Incumbent)

As a community, we have accomplished many good things for Sandy in the last several years. I feel the best is yet to come, provided we stay the course, which is to constantly develop, update and follow our City Vision and Master Plan.

The issues facing Sandy today are many. These are some of the issues I would like to continue to address in the next four years:

- Support Public Safety
- Improve City Services
- Complete Parks and Trails Master Plans
- Improve our Commercial Base
- Keep Taxes Low
- Provide Shopping Within the City
- Traffic Modeling for Road Improvements
- Improving Sandy Corners (9400 South 700 East Area)
- Community Appropriate Standards
- Preserving City Neighborhoods
- Maturing of our Community
- Preparing for Economic Down Turns
- Emergency Preparedness
- Develop a Quality Project in the Gravel Pit
- Complete Community Arts Center by the Amphitheater

It is my responsibility as your City Councilman to see that the Master Plan addresses these and other pertinent issues. The staff and the administration use the Master Plan Document as their goals. Every year the City's elected officials spend considerable effort to update the goals and vision for our community. This process includes input and ideas from neighborhoods and business communities. These methods in the past have produced major accomplishments. For example, the South Towne sub-master plan has been continuously updated. Updates included the addition of Jordan Commons, the Expo-Center and a trails system. South Towne is recognized as one of the best-planned commercial areas in the State.

Let's keep the planning process going. I ask for your vote so that I can continue to build a better Sandy for you.

## Candidate for City Council District 3

### Brigitte Dawson

I am interested in the welfare of Sandy City and its personnel, especially the Police and Fire Departments. For our city to keep the safe atmosphere we now enjoy, we have to retain our present top-notch employees by continuing to offer fair wages and benefits that are comparable with those offered by other communities. We cannot afford to lose any of Sandy's well-trained personnel to better-paying departments in this county. It is obvious that continued economic development - not raising taxes - is the key to maintaining Sandy's high standards and success.

I have been a strong advocate of public safety for 35 years. My husband of 30 years died while serving as Sandy's Chief of Police, with over 35 years of service in law enforcement. My oldest son is a Sergeant for Murray City Police Department, and my youngest son is a Firefighter Engineer/ Paramedic for Sandy City. I am very much aware of the politics involved in city and county governments.

I would appreciate the opportunity to represent your interests in making decisions for our great city. I will bring a fresh approach and new ideas to Sandy's Council.
